MISSING Information:

What's the current formula? Averaged? If yes, how many years?

In 2010, 112 awards was distributed - CS - 30%, SS - 29%, SJS - 19%, SDS - 9%, NCS - 6%, CCS - 5%, NS - 5%.

NCS and CCS loose a berth, but NS & CCS were lowest taking in 5%?

Is there a floor in the current formula (excluding LA, SF, Oak)?

What % increase gets your berth back?
